Assignment Report

Testing of mixers from Tapwell AB.

Test method NS-EN 817.

Sanitary laboratory

The test results are valid exclusively for the tested objects.

Summary			
<p>SINTEF Building and Infrastructure has, on behalf of Tapwell AB, carried out testing of kitchen, basin and shower/bath mixers type EVO, FME, LEA, DOM.</p> <p>The tests have been carried out in accordance with NS-EN 817:2008 "Sanitary tapware – Mechanical mixing valves (PN 10) - General technical specification", Clause 10.6 and 14. See Table 4.1 for conducted tests.</p> <p>Result: Passed</p> <p>Remark: The flow rate measured at 0,3 MPa shall be at least 0,20 l/s. According to NS-EN 817:2008, a flow rate of 0,066 l/s is permissible for water saving valves if appropriate information is provided. In this case, LEA878 must have this information.</p>

1. INTRODUCTION

SINTEF Building and Infrastructure has, on behalf of Tapwell AB, carried out testing of kitchen, basin and shower/bath mixers type EVO, FME, LEA and DOM.

The tests according to NS-EN 817 were conducted by Geir Lippe Stavnes.

2. TEST METHOD

The tests have been carried out in accordance with NS-EN 817:2008 "Sanitary tapware – Mechanical mixing valves (PN 10) - General technical specification", Clause 10.6 and 14. See Table 4.1.

3. TEST OBJECT

The test objects from Tapwell AB are kitchen, basin and shower/bath mixers, see Figures 3.1 -3.10. All mixers, except the shower/bath mixers, were delivered with copper supply pipes.

The mixers were delivered to SINTEF Building and Infrastructure by Iver Bjerke on 20.8.2010. They were in good condition on arrival.

TESTS, METHOD, REQUIREMENTS AND RESULTS

Table 4.1: Summary of results

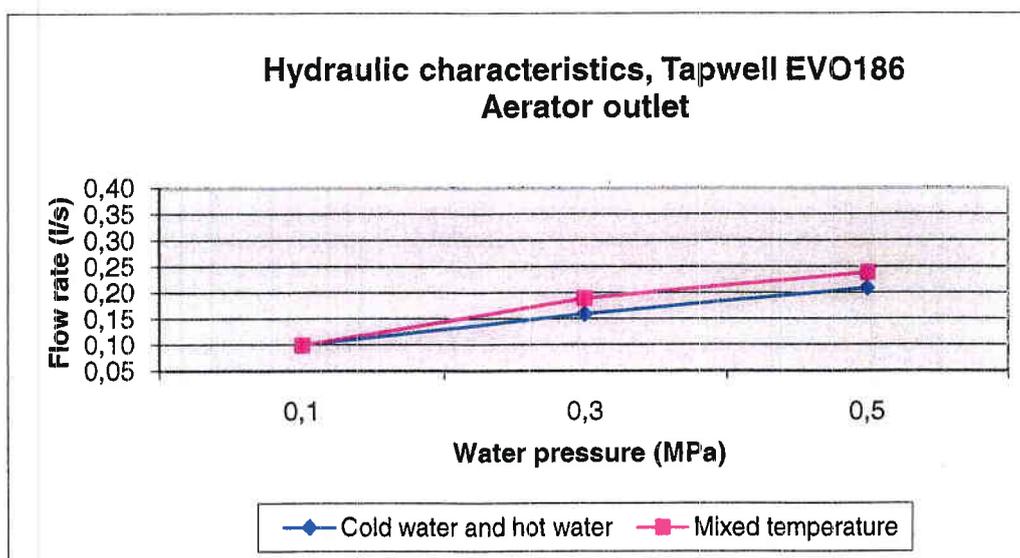

Chapter	Clause in NS-EN 817	Test	Passed		Accredited test	
			Yes	No	Yes	No
4.1	10.6	Determination of flow rate	x		x	
4.2	14	Acoustic characteristics	x		x	

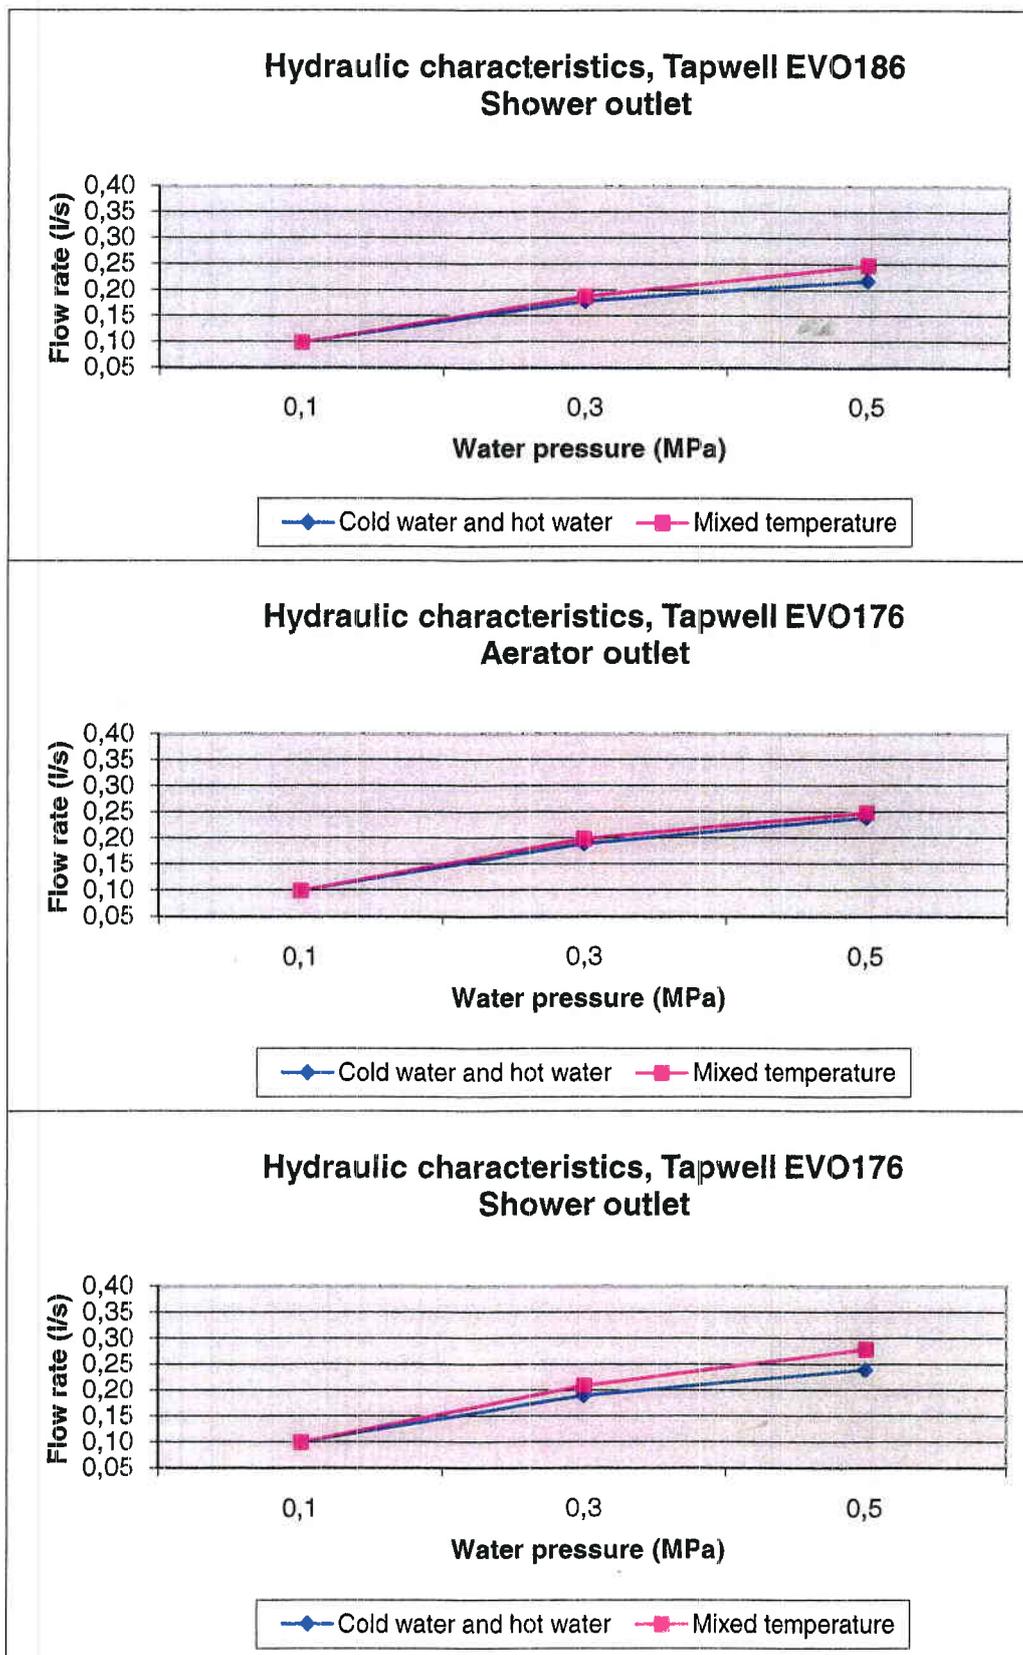

4.1 Determination of flow rate (NS-EN 817, Clause 10.6)
Method: Measuring the flow rate at 0,3 MPa

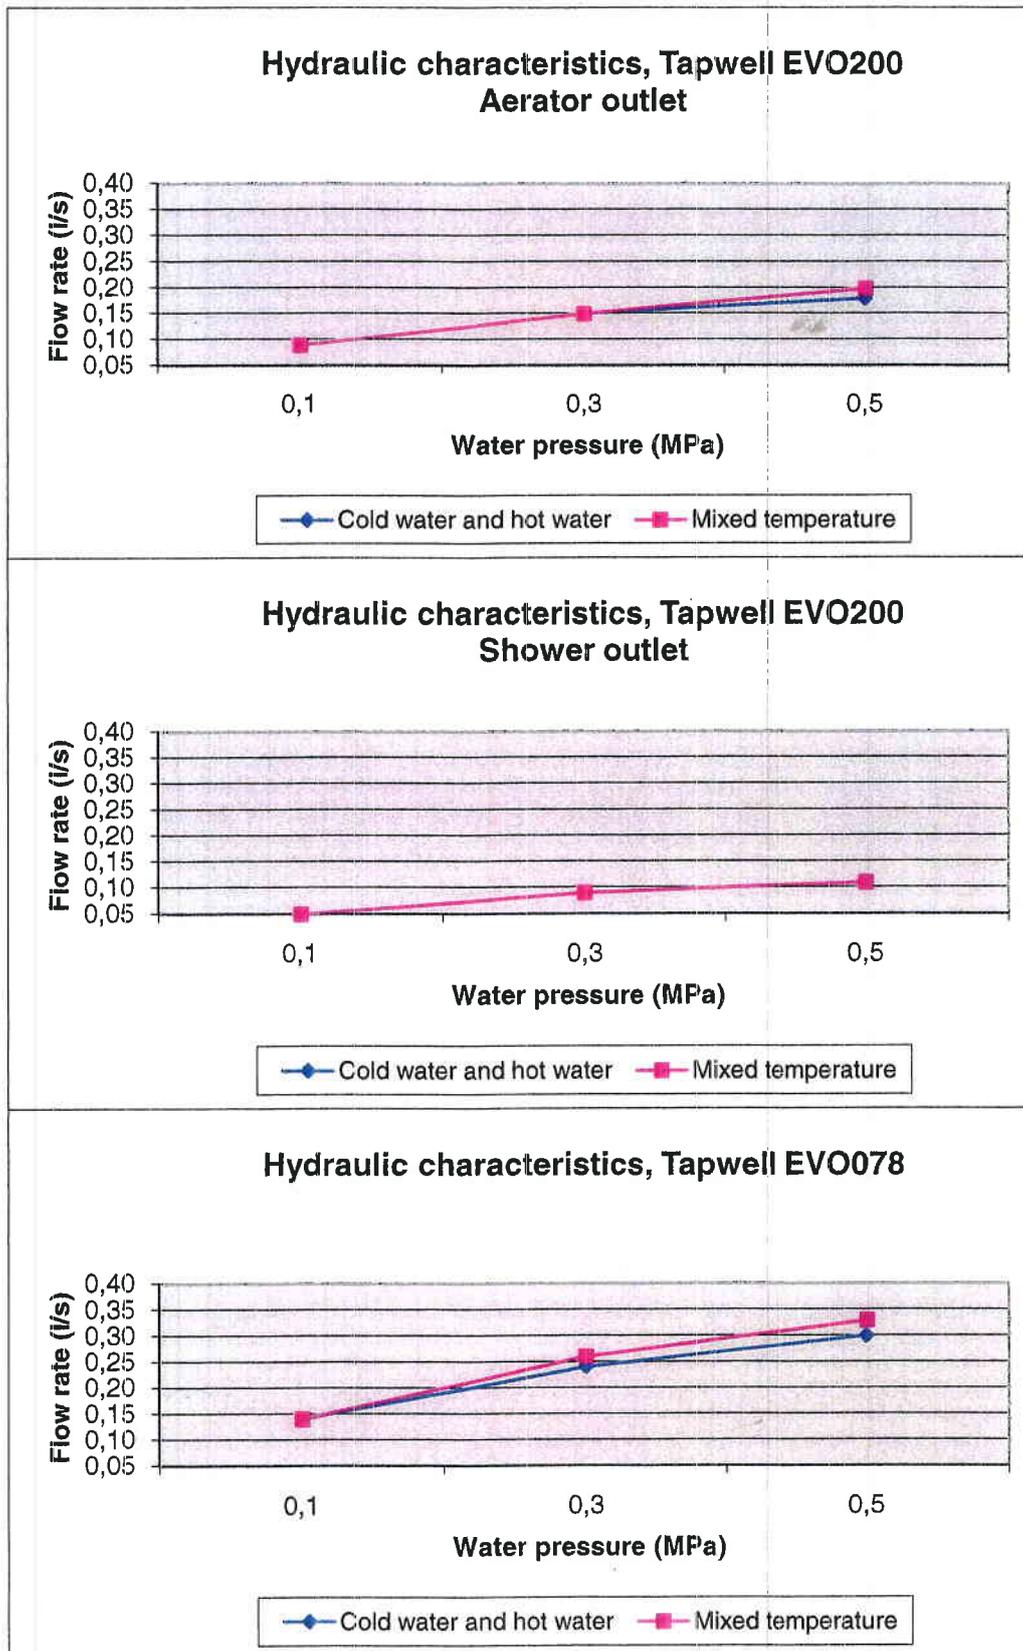

Mixer	Passed	Not passed
EVO186	x	
EVO176	x	
EVO200	x	
EVO078	x	
EVO980	x	
LES081	x	
FME181	x	
LEA878 ¹⁾	x	
DOM168	x	
DOM022	x	

Remark: The flow rate measured at 0,3 MPa shall be at least 0,15 l/s when the tap is supplied with flexible hoses or a pull out spray. The flow rate measured at 0,3 MPa shall be at least 0,20 l/s when the tap is supplied with copper supply pipes. For bath mixers, the flow rate measured at 0,3 MPa shall be at least 0,30 l/s.

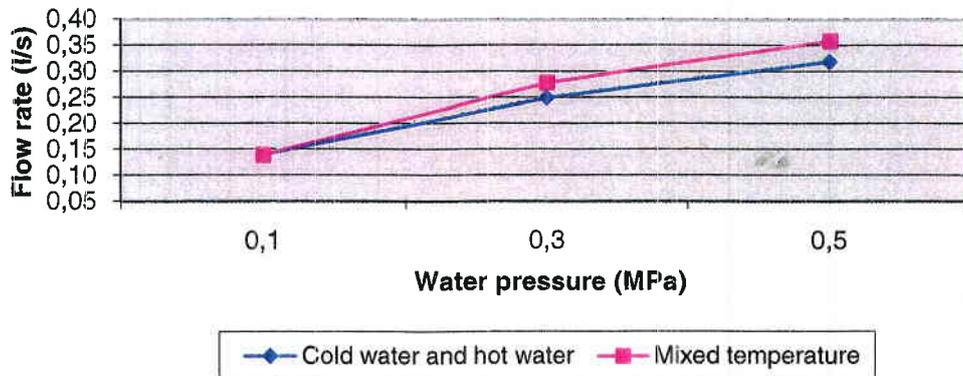

- 1) According to NS-EN 817:2008, a flow rate of 0,066 l/s is permissible for water saving valves if appropriate information is provided. In this case, LEA878 must have this information.
